SATURDAY

The graph shows a periodic variation in water level. The y-axis is labeled 'm' and ranges from 0 to 3. The x-axis is labeled 'h' and ranges from 0 to 24. The water level starts at approximately 0.8m at h=0, reaches a peak of about 1.8m at h=6, a trough of about 0.5m at h=12, another peak of about 2.0m at h=18, and continues this pattern throughout the 24-hour period.

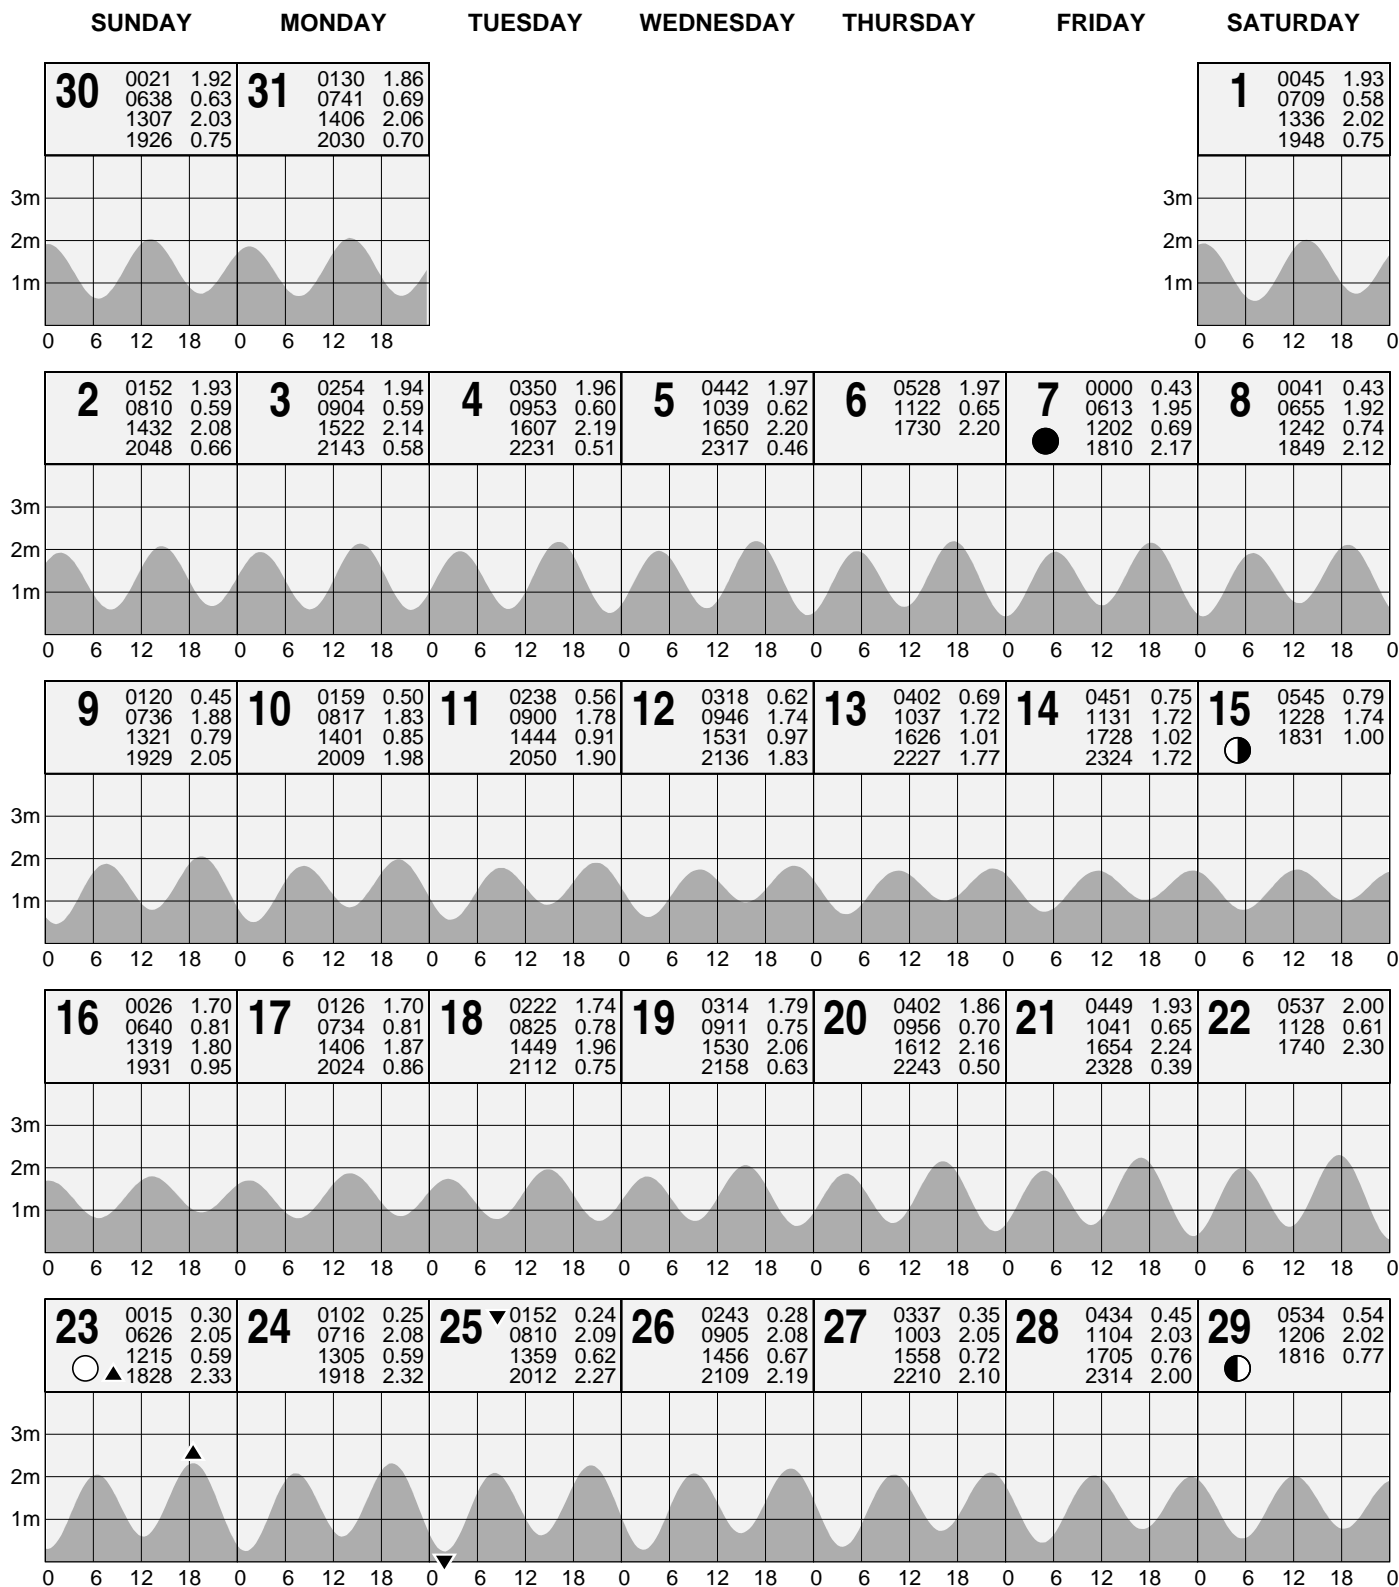

The graph displays a periodic variation in water level. The y-axis represents water level in meters (m), with major grid lines at 1m, 2m, and 3m. The x-axis represents time in hours (h), with major grid lines every 6 hours (0, 6, 12, 18, 24). The water level starts at approximately 1.5m at 0h, reaches a peak of about 2m at 12h, a trough of about 0.5m at 18h, and another peak of about 2.2m at 24h. The pattern repeats every 12 hours.
